

## What is it all about?

PAS 55 is a publically available specification for the optimum management of physical assets. It was published in 2008 by the British Standards Institution and has since gained global recognition and acceptance. It forms the basis of ISO 55000, which is currently under development.

There are many criticisms against PAS 55, but the reality is that it is the only standard available for physical asset management. It has also put asset management on the agenda of senior management, clarified many concepts and made huge progress in addressing asset-related risks.

Although PAS 55 Part 1 and Part 2 are complex documents, this course aims to clarify its intricacies. It will explain some of the concepts and take delegates on a step-by-step journey through its structure. After the course, delegates will understand how to achieve "PAS with benefits" and be able to lead its successful implementation in their organisations.

## What makes it different?

The Boot Camp was developed by asset management practitioners who have years of experience, as well as an in-depth and practical knowledge of PAS 55's strengths and weaknesses. At the end of the workshop, delegates will:

- understand **what PAS 55 is**
- understand the **principles and terminology of PAS 55**
- be familiar with **its structure**
- **be able to relate general asset management practices to the different sections in PAS 55**
- understand the **benefits of PAS 55 and how to go about achieving them**
- be able to **explain and sell PAS 55 to their colleagues at work**

## Who should attend?

- Senior Engineering and Technical managers
- Maintenance managers
- Maintenance engineers
- Production and Operational Managers
- Risk managers
- Any senior managers involved in asset management and maintenance

## Format

- Public training - scheduled at major cities and training venues
- On-site training - at your location and time, allowing your team to learn collectively

# Course outline

## Modules covered in this two day workshop:

### What is PAS 55?

This module gives delegates the context and background required to understand PAS 55:

- What is it?
- Why was it developed?
- Is it a standard like ISO 9001?
- Why does it have two parts?
- What it does and does not achieve

### Becoming PAS literate

This module teaches delegates the “language of PAS 55”:

- **Underpinning principles:** for example levels of assets, risk management, optimum asset performance and life cycle management
- **Terminology:** for example physical assets, asset portfolio, asset life cycle and asset management policy/strategy
- How PAS 55 is structured according to Deming’s **PDCA cycle**

### Making sense of PAS 55’s structure

This module takes delegates on a step-by-step journey through PAS 55’s structure. Each chapter and paragraph will be explained briefly and put into context:

- Asset management policy
- Asset management strategy, objectives and plans
- Asset management enablers and controls
- Implementing asset management plans
- Performance assessment and improvement
- Management review

### Reaping the benefits of PAS 55

PAS 55 should not be a paper exercise for achieving compliance. This workshop is promoting “PAS with benefits”:

- Performance before conformance
- How to prevent a paper exercise
- The benefits of PAS 55
- Success stories and case studies
- Key success factors

### Practical exercise

Delegates will be given an opportunity to see how PAS 55 can assist them in addressing real life asset management challenges. It will enable them to link the different paragraphs in PAS 55 to their own environment.

### Additional options for in-house workshops

- **PAS 55 Strategic Asset Management**  
The one day PAS 55 Boot Camp could be extended for a second day to allow for a more in-depth discussion of strategic issues such as risk management, asset management policy and strategy, life cycle management or setting up an asset management scorecard.
- **PAS 55 Fundamentals of Asset Management**  
The one day PAS 55 Boot Camp could also be combined with Pragma’s three day Fundamentals of Asset Management course for a more holistic and integrated view of asset management.
