

Are you struggling with your mandate to deliver public services due to unreliable equipment and infrastructure assets?

Then it is time to expand your current asset management approach beyond just compliance to sustainable and complete life-cycle asset management.

Through a partnership with Pragma, you can tap into a wealth of maintenance management expertise within the local government sector. Some of the solutions within our complete set of asset care services include:

- Asset Identification and Verification With Condition Assessments
- Condition Monitoring Technologies and Services
- Enterprise Asset Management System Implementation and Support On Key and SAP® EAM
- Facilities Management
- Asset Management Improvement Plans Gap Analyses and Maturity Assessments
- Asset Management Strategy, Plans and Policies
- Asset Management Training inclusive of Virtual Instructor Lead Courses
- Maintenance Planning and Management
