

# Pragma Academy's virtual classroom training...

## Online learning has never been more collaborative

Virtual instructor led training enables you to continue to access your learning from anywhere in the world – connecting you to subject matter experts and your peers in a live facilitated session, in real-time.

### What is virtual instructor led training (VILT)?

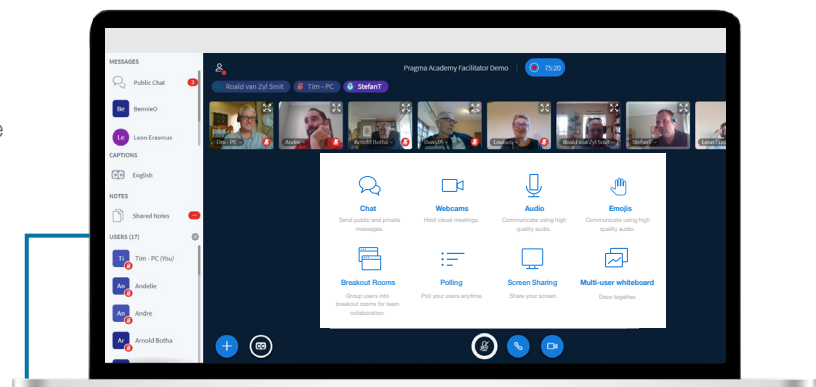

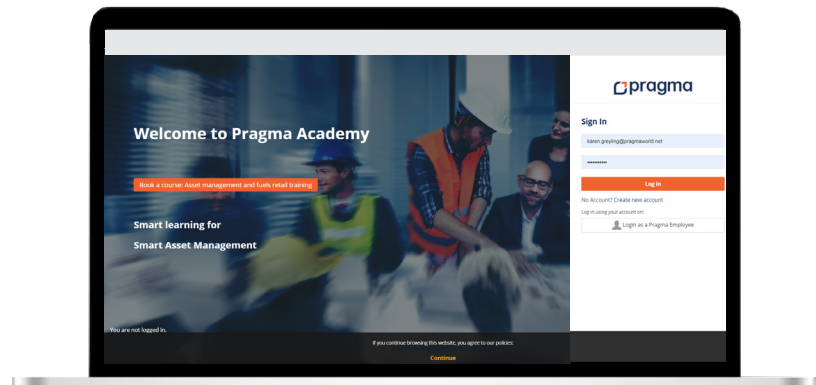

- A virtual instructor led classroom simulates a live classroom, but unlike pure elearning, a VILT classroom includes real-time facilitation.
- Virtual classrooms enable learners and facilitators who are in different physical locations to come together via the internet and communicate audio-visually.
- Virtual instructor led classrooms make use of a variety of tools to make learning interactive and engaging.

### How does the Pragma Academy offer virtual instructor led training (VILT)?

- Learners are enrolled onto the Academy Portal which is our learning management system (LMS). They are provided with a username and password which gives them access to our virtual classroom.
- Our personalised onboarding experience includes a designated success coach who ensures learners are able to quickly and seamlessly engage with our LMS.
- The course facilitator connects with and shares learning content with learners via the Academy Portal.
- Virtual breakaway rooms allow learners and the facilitator to meet in smaller groups for practical exercises and discussions.
- Facilitated sessions are recorded and saved as a resource in the Academy Portal.
- Additional resources and activities can be downloaded from the Academy Portal.
- Learners can upload, present or share material for review by their peers or the facilitator.
- Assessments are completed and uploaded online.

### What you need to participate in VILT?

- Access to a computer with a sound card and a reliable internet connection
- Ability to download material from the web and save it on to your computer
- A headset with a microphone
- A webcam is advantageous, but optional.

**Our virtual instructor led classrooms make use of a variety of tools to make learning interactive and engaging.**

The Pragma Academy uses BigBlueButton, an open-source web conferencing system, integrated into our Learning Management System, providing a **variety of tools to create an engaging and participative virtual classroom experience.**
